

July 11, 2013

The Montgomery County Public Service Authority will begin its annual inspection, cleaning, maintenance, painting and flowing of Montgomery County Public Service Authority fire hydrants. This should last between four and six weeks.

During this period, residents may experience some discolored water. If this happens, residents should run their cold water until the line clears up, which should take only a few minutes.

Please contact Don Todora at the Montgomery County Public Service Authority at 540-381-1997 with any questions.
